Tell Us How We Did

Take One Minute to Share Your Feedback

From the app:

1. Select this Workshop
2. Click on Survey to Complete

Every Workshop Survey you submit enters you into a daily drawing for **one of three \$25 Amazon gift cards!**

A screenshot of a mobile app survey form for the LTEN Annual Conference 2023. The form is titled "LTEN Annual Conference 2023" and includes a home icon. The survey questions are: "Session Name", "How valuable did you find the information presented at this session?" (with a 5-point star rating from "Poor" to "Excellent"), "What information in this session was most useful to you?" (with a text input field), and "What would have made this session better?" (with a text input field). A "Done" button is at the bottom, and a "Privacy Policy" link is in the bottom right corner.

LTEN Annual Conference 2023

🏠

Session Name

How valuable did you find the information presented at this session?

Poor Excellent

☆ ☆ ☆ ☆ ☆

What information in this session was most useful to you?

What would have made this session better?

Done

Data

The universal language of
the 4th industrial revolution

Why?

how organizations
perceive the
importance and
relevance of data

the appreciation
for the value of
data literacy

The ability of an organization to read,
analyze, use for decisions and
communicate data and insights
throughout their organization.

CONTEXT

What REALLY is Data Literacy?

Data

You can access the polling using the QR code provided using your smart device, phone or iPad

You can also access the polling questions by going to Mentimeter.com and entering the code **XXXXXX**

How many google searches were conducted on a daily basis in 2023?

- A – 1.9 Billion
- B – 2.5 Billion
- C – 2.9 Billion
- D – 3.5 Billion

What was the % increase in data interactions from 2010 to 2023

A – 750% (7.5 X)

B – 2000% (20 X)

C – 5000% (50 X)

D – 10000% (100 X)

How many years would it take to download all data on the internet?

A – 18.1 years

B – 181 years

C – 181,000 years

D – 181,000,000 years

How much data is stored in the average human brain?

- A – 25 gigabytes
- B – 250 gigabytes
- C – 250,000 gigabytes
- D – 2,500,000 gigabytes

In 2000...

3.5 Billion

Google Searches on a
Daily Basis WW

It would take
181 Million Years
To Download the Internet Today

Data

+5000% Increase

Data Interactions since 2010

2.5 Petabytes

Storage capacity of the average Human Brain

Refining

Where does this obsession with data gathering come from?

The earliest forms of written expression can be found in ancient civilizations who used cuneiform tablets and cave drawings to record and store data

285 BC the Library of Alexandria in Ancient Egypt held between 40,000 and 400,000 scrolls of written works

Halle in der Alexandrinischen Bibliothek.

Today, the entire Library of Congress can be stored on a 15 terabytes hard drive

Data Literacy is...

The ability to...
Explore, Understand,
& Communicate
using data.

Explore

To get value from data, you need to know how the data is defined and how to ask the right questions

Communicate

Effective communication is key once all of your questions have been answered, and you share critical new insights with others

Understand

Next, as we begin to understand the data, we analyze it, measure its impact to draw insights and make informed decisions

FACT: Data-driven decision-making significantly improves business performance

Data acumen is a necessary competency across every role in the organization

The ability to analyze data, ask the right questions and draw customer insights are skills that anyone can develop

There are many ways for individuals to upskill themselves and for companies to support them, lift insight discovery capabilities, and drive change for the organization

Why is Data Literacy important?

Reason #1:

First, data literacy is the ability to ask the right questions... to cultivate & act on relevant insights.

Reason #2:

Which gives us a better understanding of customer behavior that can lead to competitive advantage.

Reason #3:

We all need to be prepared to be part of the conversation (literally!)

Data Literacy is not

Data science combines scientific method, math, statistics, specialized programming, advanced analytics and AI to prepare mostly unstructured data assets

You can access the polling using the QR code provided and your smart device, phone or iPad

You can also access the polling questions by clicking on the “ENGAGE” tab on your screen

What are the key differences between Big Data and traditional data?

A – Volume, Velocity, Variety, Veracity and Value

B – Size, Structure , Storage and Synthesizing

C – Largely Qualitative, Unstructured; may require AI to Process

D – All of the above

What is unstructured data vs. structured data?

A – Text-heavy, but may contain data such as dates, numbers, and facts

B - Does not have a pre-defined model or is not organized in a pre-defined manner

C - video, audio or image files, as well as log files, sensor or social media posts

What is a data lake?

A – A form of raw data storage that is used for unstructured, big data sources

B – A storage facility that uses a water-cooled ventilation system

C – A “nickname” for the man made lake in the center of the Oracle campus in Santa Clara, CA
